PRODUCT CATALOG

As Uzunkaya Dikimevi, we have been designing and producing textile products for the needs of the Turkish Armed Forces, General Directorate of Security and weapon manufacturers since 2018.

Working in the defense industry, we are aware of the quality standards required. We have been working hard not to compromise the military standards at each stage of our projects.

As Uzunkaya Dikimevi, we know the value of R&D and we stand by open-minded people with a project in the field of defense industry. We are here for all kinds of sewing and design needs in the textile field. If you have a project we can help you with, you can consult the R&D section for detailed information.

#### OUR SERVICES:

##### DESIGN

Your needs are determined by interviews. The yarn and weaving are specified to meet these needs. If the specified fabric is not available in the market, meetings are held with our solution partners for the production of the proper fabric. The technical characteristics of the desired product are determined, the patterns are drawn and the steps required for production are reviewed.

##### SAMPLE PRODUCTION

After determining the necessary characteristics during the design phase, the fabric suitable for the sample is cut with the patterns drawn and sewn by a suitable machine for the job. At this stage, the production path to be followed in the case of mass production becomes clear. The prototype is presented to you and it is tested according to your needs when needed. The material and labor costs of the production will be calculated. Domestic and international market research is conducted for similar products. the quotation is provided at this stage.

##### MASS PRODUCTION

Mass production is started upon your approval of the prepared sample. A production line is established in the workshop. The products are subjected to quality control at certain stages during production. After the final quality control of the finished products, the products are packaged and delivered to you.

#### R&D:

As Uzunkaya Dikimevi, we believe that good is the enemy of perfect, therefore we are ready to offer our opportunities to support those who are not satisfied with the good and seek perfection.

We value the projects in this field in order to create original products or further improve the products we produce. If you have a project for the defense industry and you need help in the field of textile, we are here to help you.

We do not charge any fees for the work we do for you to support R&D projects.

If you want to take part in product innovation but do not know where to start, we can help you. You can be involved in one of our R&D projects. You can reach us via email or pay a visit to our workshop and have a cup of tea. We welcome the people who design, produce or seek to further their knowledge.

## **CONTENTS**

### **BAGS**

# BAGS

## Gun Cleaning Kit Bag

### With Bandoleer Clip

Designed to carry the materials used in the cleaning of the MPT (National Infantry Rifle). It is suitable for the military standards and harsh usage conditions. The product is used by the Turkish Armed Forces. The bag has two parts that provide ease of use and further organization. This model provides lateral support to prevent the contents from being crushed during transportation. There is a clip on the back which allows the bag to be attached to a bandoleer and be carried. Snaps and velcro have been added to prevent the bag from opening during the user's movement. Made of CorduraD550 fabric.

STOCK CODE: **CTS-01**

4

### Standart

Suitable for the military standards and harsh usage conditions. The bag has two parts that provide ease of use and further organization. This model provides lateral support to prevent the contents from being crushed during transportation. Snaps and velcro have been added to prevent the bag from opening during the user's movement.

STOCK CODE: **CTS-02**

# Foldable Gun Care Kit Bag

## With Guide Pocket

Designed for the field, this product has a compact design allowing it to be folded and locked with straps while being transported. Hydrophobic coating has been used to provide additional resistance to water. Fabric used in this bag is resistant to wear. Bactericidal (bacteria killing) coating is used, taking the operators' health into consideration.

**STOCK CODE: CBK-01**

## Grenade Launcher Cleaning Kit Bag

Designed to preserve large brushes used in grenade launchers. There are cords on the sides to protect the bag against deformation. It is suitable for the military standards and harsh usage conditions. Waterproof option is available.

STOCK CODE: **CTS-03**

6

## Material Carrying Bag Small

This is a simple type prepared for conveying various materials. Due to the simplicity of the product, it is more affordable than the other options.

STOCK CODE: **CMT-01**

## Foldable Gun Care Kit Bag

Designed for the field this product has a compact design that can be folded and locked with straps while being transported. Hydrophobic coating has been used to provide additional resistance to water. Fabric used in this bag is resistant to wear.

STOCK CODE: **CBK-02**

7

## Tool Bag

Designed to carry various materials. There is a compartment for the user manual on the back. It is designed and sewn to be resistant to water and last long against abrasion. It is made of Cordura1050 fabric.

STOCK CODE: **CT-01**

# RIFLE SLINGS

## Padded Rifle Sling

It is designed for comfortable carry. The belt is woven in such a way that it can withstand high forces so that it can be used for other works (such as fixing or hanging a certain load) when needed. In order to provide comfort to the user, a pad is used in the part where the body is loaded. The pad used is in honeycomb design and distributes the load on it evenly and breathes. In order to provide high strength to the junction part of the pad and the belt, double envelope type sewings are applied.

**STOCK CODE:** KP-02

**The product has QD (Quick-Detach) or hook type mounting options.**  
(If necessary, different ends are designed according to the weapon.)

**The product has QD (Quick-Detach) or hook type mounting options.**  
(If necessary, different ends are designed according to the weapon.)

## Tactical Rifle Sling

The belt is woven in such a way that it can withstand high forces so that it can be used for other works (such as fixing or hanging a certain load) when needed.

STOCK CODE: **KD-01**

10

## Supported Rifle Sling

It is designed for comfortable carry. It makes an economical option compared to the KP-02 model. Adjustable shoulder support on the strap provides comfort to the user.

STOCK CODE: **KP-01**

# MILITARY CLOTHING

## Military Pullover

Designed for the field. Ripstop gabardine fabric, cotton/polyester blend fabric, antibacterial fabric, nano-fabric can be used.

**STOCK CODE:** **GU-01**

# CASES

## Pistol Mag Pouch

Prepared for carrying pistol magazines. Can be attached to assault vests, mission belts and bandoliers.

STOCK CODE: **KTS-01**

12

## Rifle Mag Pouch

Suitable for carrying 12.7 mm sniper rifle magazines. Can be attached to the assault vest and bandolier.

STOCK CODE: **KSS-01**

# ROD POUCH

## Rod Pouch

Made for carrying 12.7 mm and 40 mm weapon rods. The fabric is covered with a hydrophobic coating to protect the contents against moisture.

STOCK CODE: **KH-01**

## Rod Pouch (PVC)

Made for carrying 12.7 mm and 40 mm weapon rods. Waterproof PVC fabric is used.

STOCK CODE: **KH-02**

# MACHINE GUN ACCESSORIES

## 50 Round Ammunition Container

Prepared to feed the ammunition belt to the machine gun. The upper part is designed to further reduce feeding malfunctions. The bottom is zippered for easy refilling. In order not to create additional weight on the gun, fabric is preferred instead of plastic. Sides are strengthened with special plates placed in the fabric.

STOCK CODE: **MK-01**

14

## Cartridge Collector

It is designed to collect discharged cartridges. The upper part is made of top quality plastic. The fabric is fireproof and heat resistant so that recently discharged cartridges, being hot, do not damage the product. By using the zipper at the bottom, the pouch can be emptied with ease.

STOCK CODE: **MKT-01**

# 200 Round Ammunition Container

Specially designed for unmanned aerial vehicles while giving importance to weight reduction and feeding stability. The upper part is designed to further reduce feeding malfunctions. The bottom is zippered for easy refilling. In order not to create additional weight on the gun, fabric is preferred instead of plastic. Side strength is increased with special plates placed in the fabric.
